Connie Hames Earns Microsoft Certification

Green Bay, WI – ZyQuest Resource Manager, Connie Hames, has earned Microsoft certification in .NET, Microsoft's platform for developing and running Web-based services and applications.

Hames spent more than a year working through the certification process. "I did not attend any training for this certification," Hames explained. Everything was self-taught – many hours of self-teaching!" She was also required to take a series of five tests. She successfully passed the last test in August.

According to Microsoft, "The Microsoft Certified Solution Developer (MCS D) for Microsoft .NET credential is the top-level certification for advanced developers who design and develop leading-edge enterprise solutions, using Microsoft development tools and technologies as well as the Microsoft .NET Framework. The MCS D credential is one of the most widely recognized technical certifications in the industry."

In addition to professional recognition, Microsoft certification provides valuable access to Microsoft technical conferences, training sessions, and product information.

Hames commented that while the Microsoft "perks" are valuable, she initially decided to obtain certification so that she could teach Microsoft Certified classes. ZyQuest offers several such classes through its technical education partner, Binary Training.

Headquartered in De Pere, ZyQuest, Inc., is a full-service information technology consulting company offering a broad range of IT services, including staff augmentation, project management and outsourcing, Internet solutions, and technical education. While Zyquest has focused on serving clients in the Green Bay-Fox Valley area during its eleven years in operation, ZyQuest also provides IT services to customers both nationally and globally.
