ZyQuest Promotes Len Janke

Green Bay, WI – Information Technology Company ZyQuest, Inc., has promoted Len Janke to the newly created position of Director of Project Services.

In his new role, Len will be responsible for building ZyQuest's Project Outsourcing practice and managing all in-house development efforts. The creation of this new position will allow ZyQuest to better meet the challenges of its growing in-house development practice.

Janke is a business-orientated Information Technology professional with over thirty years of progressive experience in both retail and manufacturing. His experience includes business process improvements, business systems implementation, and operational support. His information technology background includes business systems development, technical support, voice and data communications, and data center operations at a global corporate level. He has managed annual capital and expense budgets exceeding \$7,000,000 and directed staff of up to fifty individuals.

Janke has managed all phases of the systems development life cycle from strategic planning through installation. This includes short and long-term planning, budgeting, systems requirements definition, software evaluations and selection, development of functional and technical design specifications, system construction, testing, and installation.

For more than 11 years, ZyQuest, Inc. has been providing IT services to clients in NE Wisconsin and around the country. Some of the ZyQuest's current outsourcing clients include Rocketplane/Kistler, Non-Typical, Breakthrough Fuel, Improved Living Services, Boscovs, Benefit Advantage, St. Vincent/DePaul, and Eva.
