Len Janke Joins ZyQuest as Senior Consultant

Green Bay, WI – Len Janke has joined Information Technology Company ZyQuest, Inc., as Senior Consultant. In that role, Janke is spearheading ZyQuest's new Strategic Consulting Group.

Formerly Director of Business Information Technology with Grede Foundries, Janke brings 35 years of IT experience to ZyQuest, the last 23 of those years in director roles. Janke's responsibilities at ZyQuest include resource staffing, establishing alliances, consulting, and assisting the group in managing requests and assignments.

The Strategic Consulting group will be offering ZyQuest clients two new services: strategic business systems planning and strategic technology planning. The major goal of both services is to help companies improve their existing IT infrastructure or implement new IT programs or practices to facilitate their ultimate business goals.

In describing ZyQuest's new services, Janke commented, "One of the problems facing today's businesses is the difficulty in finding and retaining expertise in an era of ever changing business and technology conditions. As a result, outside resources are needed to help companies align information technology with business goals. ZyQuest provides those resources."

Janke will be working out of ZyQuest's Milwaukee offices.

ZyQuest, Inc. is a full-service Information Technology (IT) consulting company that has been serving clients in Northeast Wisconsin for 11 years. In addition to its new Strategic Consulting services, ZyQuest provides SAP services, IT staffing, project outsourcing, and technical education.
