## **Mills Perry Publishes Article in International IT Journal**

De Pere, WI – Mills Perry, an Information Technology (IT) consultant and instructor with local IT company ZyQuest, has received international recognition with the publication of an article in this month's issue of *MQ Update*, a technical journal for computer programmers and systems administrators around the world.

The journal is produced by Xephon, a British company headquartered in Newbury, England. With offices throughout the world, including the United States, Japan, Germany, and Yugoslavia, Xephon is an international consultancy and research organization specializing in large information systems. *MQ Update* is one of several journals that Xephon publishes for disseminating information to computer professionals.

Perry's article explains how to use Visual Basic for the publish/subscribe feature of WebSphere MQ, an IBM product that helps programs talk to each other through messaging. (MQ stands for Message Queuing.). Visual Basic is a high-level computer programming language that simplifies the creation of design forms, such as buttons and pop-up menus. The article is titled, "Using publish/subscribe in WebSphere MQ Integrator".

In addition to his expertise in WebSphere MQ, Perry is a recognized authority on XML, a language that allows disparate computer systems to talk to each other. For the last four years, Perry has flexed his computer muscle for ZyQuest, specializing in Visual Basic and teaching XML.

ZyQuest, Inc., is a full-service information technology consulting company offering a broad range of IT services, including staff augmentation, project management and outsourcing, Internet solutions, technical education and SAP services. While ZyQuest has focused on serving clients in the Green Bay-Fox Valley area during its twelve years in operation, ZyQuest also provides IT services to customers both nationally and globally.
